EDUCATION

Yeshwantrao Chavan College of Engineering

2021 – 2025

B.Tech in Computer Science & Engineering — CGPA: 8.2

TECHNICAL SKILLS

Languages: Python, C#, Java, JavaScript, TypeScript

Web & Frameworks: Django, Streamlit, Angular, Next.js, .NET / ASP.NET Core

AI / ML: LangChain, RAG, LLM application development

Databases: MySQL, PostgreSQL, SQL Server

Tools & Platforms: CopyBara, Git, VS Code, IntelliJ IDEA, Power Apps, SharePoint, Dataverse

Core CS: OOP, DBMS, Data Structures & Algorithms

EXPERIENCE

LTIMindtree | Engineer — Industrial IoT

Sept 2025 – Present

- Completed training in .NET Full-Stack Development, followed by Python Full-Stack Development with Angular, securing the 2nd highest rank in the cohort with a 91% score.
- Built a full-stack Leave Management System end-to-end, then joined the project team to ship patches and develop APIs.
- Working directly on a **Google** client project focused on Python OSS package upgradation, engaging in **daily interaction with Google developers** for guidance and code reviews.
- Continuously working with Git/GitHub and Python packages, and creating automation scripts to reduce manual effort and improve team efficiency.

Solar Industries India Ltd | Intern

Jan 2025 – Sept 2025

Web Developer Intern (Jan 2025 – May 2025)

- Led the core development and implementation of a Detonator Planning application using Django and Next.js, managing the full procurement planning workflow.
- Integrated Power Apps, SharePoint, and Dataverse to build internal tools.
- Earned the Shabash Award for outstanding project delivery and successful organizational adoption of the application.

AI/ML Intern (Jun 2025 – Sept 2025)

- Designed and deployed an LLM-powered Email Classification system using LangChain that categorizes emails into 9 types and tracks embedded task statuses.
- Built an interactive Streamlit dashboard for real-time analytics and workflow visibility, streamlining operational productivity for the team.
- Recognized as Intern of the Month for consistent high-impact delivery across the internship.

PROJECTS

Leave Management System — Full-Stack Web Application

- Built a role-based Leave Management System with separate user and admin workflows, enabling employees to apply for leave, managers to approve requests, and admins to manage employee-manager assignments and departments; implemented soft delete and delete locks to ensure data integrity and prevent accidental data loss.

Tech Stack: C# , .NET, Angular (TypeScript)

AI Email Classifier — *LangChain / Python*

- Developed an AI pipeline that automatically classifies emails into 9 categories and tracks embedded task statuses, significantly reducing manual triage effort.
- Visualized real-time analytics and task progress via an interactive Streamlit dashboard, improving team workflow efficiency.

Tech Stack: Python, LangChain, Streamlit, PostgreSQL

Detonator Planning System — *Full-Stack Web Application*

- Designed and built an order management platform for planning and procuring explosive materials, replacing a manual process with a structured digital workflow.
- Implemented features for order creation, status tracking, and inventory management with a clean, production-ready UI.

Tech Stack: Django, Next.js, PostgreSQL, Tailwind CSS

ACHIEVEMENTS & CERTIFICATIONS

- Recognized as Intern of the Month 4 times over an 8.5-month tenure at Solar Industries India Ltd.
- Scored 91% on LTIMindtree Milestone 3 assessment (2nd highest in cohort); achieved all 4 KPIs throughout training.
- Active competitive programmer: LeetCode (300+ problems), CodeChef (1400+ rating), HackerRank (3 stars).
- Attended IIT Bombay Techfest Machine Learning Workshop.
- Certifications: Python Programming (Coursera), Microsoft Azure Fundamentals (AZ-900).
